WEATHER OF CONCERN

Weather of Concern

Northern California:

Critical fire weather conditions exist across portions of northeastern California, to include Modoc and Lassen counties through this evening, as winds are forecast to increase and relative humidity values are forecast to drop into teens and single digits. Hot temperatures are expected through the weekend. Monsoonal moisture will bring chances for showers and thunderstorms to the higher elevations later in the week.

Southern California:

Onshore flow will help temperatures to cool off slightly on Sunday over the coastal areas, but some inland areas will remain under an Excessive Heat Advisory and Excessive Heat Warning through this evening. Elevated fire weather conditions are expected to continue through Monday as the hot, dry and gusty winds continue across the mountains and some valleys. Temperatures continue to be above normal through this week, but will cool off by mid week.

SOUTHERN CALIFORNIA

High pressure aloft will continue hot weather. Temperatures will slowly decrease over the next few days. Monsoonal moisture will bring a chance of showers and thunderstorms each day, mainly over the mountains and deserts. There will be a better chance of more significant rainfall across more areas on Tuesday and Wednesday as moisture increases with passing easterly waves. Onshore flow will help temperatures to cool off slightly on Sunday over the coastal areas, but some inland areas will remain under an Excessive Heat Advisory and Excessive Heat Warning through this evening. Elevated fire weather conditions are expected to continue through Monday as the hot, dry and gusty winds continue across the mountains and some valleys.
